Forecast for Tuesday 15 Jun 2021

Weather: Dry and settled with any early morning cloud soon clearing leaving the whole area with an ample supply of sunshine although a little hazy at times. It continues fine, dry and settled during the afternoon, and into the overnight period. However cloud may increase a little from the north and west close to midnight.

Chance of cloud free mountain/hill tops above 600m: 100% throughout.

Visibility: Visibilities very good with distant hills visible from summits. Excellent air clarity.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

High UV levels are likely to be high during sunny spells, so sun protection is recommended if you plan to spend much of the day in the mountains. It is also likely to become rather warm so be aware of hydration.

Forecast for Wednesday 16 Jun 2021

Weather: Cloud will increase from the north and west overnight leading to a cloudier start to the day on Wednesday, perhaps with a pockets of light rain or drizzle west of Craig-y-nos. Cloud should break a little during the course of the day with some sunny/brighter spells developing from late morning into the afternoon. Clouding over again from late afternoon with an increasing risk of heavy showers, potentially thundery during the evening and overnight.

Maximum wind: Southwesterly 10-15mph gusting 20-25mph.

Chance of cloud free mountain/hill tops above 600m: 50% rising to 80% from late morning, reducing to 50% during the evening.

Visibility: Poor across western summits with cloud bases close to 500-600m, elsewhere generally good, with cloud bases above summits. Visibilities improving across all areas during the morning becoming very good however, sudden deteriorations are possible from late afternoon in association with heavy and potentially thundery showers later.

Temperature: **Valleys:** Plus 10 Celsius, rising to plus 18 Celsius.
At 600m: Plus 6 Celsius, rising to plus 15 Celsius.
Freezing level: Above summits.
